5	Hanging bar (HNG-BAR)
8	Vertical pole top (VPL-T)
2	Vertical pole bottom for foot (VPL-BTM)
6	Vertical pole bottom with raised pad (VPL-BTM-RP)
2	Foot
3	Shelf Kit
3	Spot Light Connector
4	Corner Connector

Packing Solution:

Hard case options available for shipping. Call your sales representative for more information. Below are lists of content per carry bag and accessory bag.

Two Rolling Carry Bags:

- all vertical posts

Two Accessory Bags:

- all horizontal bars
- all hanging bars
- feet
- accessories

ASSEMBLED VIEW

TOP VIEW

Step 1: Assemble Outside Vertical Posts

Assemble right outside post by sliding top vertical post (VPL-T) to bottom vertical post (VPL-BTM-RP.) Repeat for left outside post.

Step 2: Attach Feet to Center Posts

To attach the vertical pole bottom (VPL-BTM) to foot, lift the lever on the post and slide onto the foot. Then, push the lever down and lock the post onto the foot.

Step 3: Assemble Center Vertical Posts

Connect left center post by sliding top vertical post (VPL-T) to bottom vertical post with foot (VPL-BTM.) Repeat for right center post.

Step 4: Attach Top and Bottom Bars

Attach top and bottom horizontal bars of frame to vertical posts. First, line up the horizontal bar (HZ-BAR) with the bottom left vertical post and with the center vertical post. Lift the lever on the horizontal bar (HZ-BAR) and slide onto the left vertical post. Then, push the lever down to lock. Secure the bottom horizontal bar (HZ-BAR) by locking to the center vertical post. Repeat on top and bottom for each panel.

Step 5: Assemble Side Panels

Refer to Step 1 to assemble left and right vertical posts. Attach top and bottom horizontal bars of frame to vertical posts. First, line up the horizontal bar (HZ-BAR) with the bottom left vertical post and with the right vertical post. Lift the lever on the horizontal bar (HZ-BAR) and slide onto the left vertical post. Then, push the lever down to lock. Secure the bottom horizontal bar (HZ-BAR) by locking to the right vertical post. Repeat for second side panel.

Step 6: Attach Side Panels

Insert corner brackets into opening on the side of the vertical post. Insert winged screw into corresponding hole on the opposite side of the vertical post and twist until tightened. Repeat for each side of the corner, using one connector toward the top of the frame and another near the bottom. Repeat for second side panel.

Step 7: Attach Center Support Bars

For support, hang the center support bar (HNG-BAR) in each panel. Attach support bars by connecting in vertical post notches. Repeat for each panel. Stagger the center support bars across kit.

Step 8: Apply Graphics

Install graphics by folding the graphic over the silicone edge. Start by inserting graphic into each corner of each panel. Graphic inserts into inside channels on the right and left sides and the outside channel on top and bottom. Then push the graphic into the channel around the perimeter of the frame. Assure each graphic is tightly inserted. When taking graphics off, take care to gently pull by attached pull tab.

Step 9: Attach Lighting

To attach lighting, slide light connector onto the top horizontal bar (HZ-BAR) at desired location. Then, slide LUM 200 LED light onto the dovetail on top of the connector.

Step 10: Attach Shelving

Attach shelving by connecting to vertical post notches at desired height location. Repeat for each shelf.
